

NOTICE TO PROVO CITY UTILITY CUSTOMERS

State law requires that Provo City provide an annual disclosure of funds transferred from the utility enterprise funds to the General Fund. Historically, Provo has budgeted for the transfer of 10% of utility fund revenues to the General Fund as a “dividend” to Provo taxpayers as the result of the taxpayers’ investment in the City’s utility infrastructure. These funds are used each year to help cover the costs of important City services like police, fire, parks and recreation, and other city functions. The utility transfer, together with franchise fees, helps keep property taxes in Provo low. If City utility services were provided by private utility owners, these dividends would instead be paid to investor-owners. Because Provo taxpayers are the investor-owners, these dividends are used to offset what otherwise would be a significant increase in property tax rates. The 10% transfer totals \$11,381,700 in the proposed 2020 budget.

Since 2013, a 1% transfer from utility fund revenues has been transferred to the General Fund to be used to enhance available funding for road maintenance. The 2020 budget proposes that \$1,138,170 be transferred to the General Fund.

It is more cost effective and operationally efficient for certain administrative functions such as legal, human resources, information technology and finance to be administered on a city-wide basis. Transfers from the funds receiving the benefit of these administrative services to the General Fund totaling \$1,209,022 have been included in the proposed 2020 budget.

A resolution was passed on November 15, 2011, allowing for an Energy rate increase for Telecom Debt Service fee. These fees provide funding for Telecom Debt Service payments. The transfer to the Telecom Debt Service fund totals \$3,250,000 in the proposed 2020 budget.

Provo City is in the process of implementing a city-wide system known as Provo 360. The system will benefit residents, customers and all departments of the City. The proposed 2020 budget includes transfers of \$659,054 to the Provo 360 Fund.

A transfer of \$511,995 from the Wastewater Fund to the Water Fund has been included in the 2020 proposed budget. The transfer is a reimbursement for management services provided to the Wastewater Fund by the Water Fund.

This table outlines the transfers described above:
