STAFF PRESENTATION

The Staff Report to the Planning Commission provides details of the facts of the case and the Staff's analysis, conclusions, and recommendations. Key points addressed in the Staff's presentation to the Planning Commission included the following:

- The proposed PRO zone would apply to a specific site that already has apartment units and an office building approved through former actions of the Planning Commission.
- The three main items in the proposed PRO Zone included: Limiting the office type uses allowed within the proposed zone to avoid future parking conflicts; an allowance for shared parking between the office and residential uses; and, not having a parking requirement for additional office parking as the amount of residential spaces would be sufficient for the office need during their business hours.

PLANNING COMMISSION DISCUSSION

The discussion by the Planning Commission did not include discussion on the language of the proposed PRO zone, but instead included the following related to the site plan:

- The Commission asked clarifying questions regarding the access to the site, including the right-in/right-out on 500 West, and the potential for any other access points such as the neighboring property to the south. Staff responded that a connecting access to the south would likely cause more issues as it would create a by-pass access for parents dropping children off at the school on the north side of the site.
- The Commission generally commented that they otherwise did not even realize the office building had approved apartments, and that given the existing nature of the site and its basically having a 20-year trial period, they did not believe the additional 6-unit building would have a large impact on the site.
