

Planning Commission Hearing Staff Report

Hearing Date: April 12, 2023

*ITEM #8

Ryan Salmon is requesting a Zone Map Amendment from the CG (General Commercial) and R2PD (Two Family Residential) zones to the HDR (High Density Residential) zone in order to build a new twelve-unit apartment building, located at 2050 N Canyon Road. Pleasant View Neighborhood. Aaron Ardmore (801) 852-6404 aardmore@provo.org PLRZ20220302

Applicant: Ryan Salmon

Staff Coordinator: Aaron Ardmore

Property Owner: Canyon FG LLC: Salmon, Ryan J & Jessica (ET AL)

Parcel ID#: 20:050:0029; 20:050:0031

Acreage: 0.48

Number of Properties: 2

Number of Units: 12

ALTERNATIVE ACTIONS

- 1. **Continue** to a future date to obtain additional information or to further consider information presented. The next available meeting date is April 26, 2023, at 6:00 Р.М.
- 2. Recommend Denial of the requested Zone Map Amendment. This action would not be consistent with the recommendations of the Staff Report. The Planning Commission should state new findings.

Current Legal Use: The property at 2050 N Canvon Road is currently a real estate office in the CG (General Commercial) zone; and the legal use of 2044/2046 N Canyon is a twofamily dwelling in the R2PD zone.

Relevant History: The properties have been zoned CG and R2PD since 1993, and the commercial property has had a variety of uses over the last thirty years. The applicant initially made an application for a three-story, fifteenunit apartment building, but has worked over the last six months to address neighborhood and staff concerns and now is asking for a two-story, twelve-unit building.

Neighborhood Issues: Initial concerns from an October 2022 neighborhood meeting were related to the height, density, and parking for the original concept. There have not been any comments on Open City Hall on the revised concept at the time of this report.

Summary of Key Issues:

- The concept plan layout, density, height, and parking count are being secured by a proposed Development Agreement with the rezone request.
- The plan brings an additional twelve residential units that fit in to the surrounding area.
- The rezone is tied to a General Plan map amendment for 2050 N Canyon Road.

Staff Recommendation: Staff recommends that the Planning Commission recommend approval of the zone change subject to approval of a Development Agreement.

OVERVIEW

Ryan Salmon is requesting approval of a rezone from the CG and R2PD zones to the HDR zone in order to build a twelve-unit apartment building over two properties on North Canyon Road. This request is associated with a request to change the General Plan designation of the north property from commercial to residential, and a concept plan that would be tied to this rezone request through a Development Agreement. The reason the HDR zone is being requested for a MDR (Medium Density Residential) zone density project is for the reduced yard requirements in the HDR zone.

The related concept plan proposes an "L-shaped" apartment building fronting Canyon Road, with a surface parking lot hidden behind and accessed off of 2100 North. The building has six, one-bedroom units on each of the two levels, each around eight-hundred (800) square feet. The building elevations show a height of twenty-four feet (24') to the parapet, and just under thirty-feet (30') to the midpoint of the sloped roof features. For context, single-family homes have a permitted height of 35'.

The site includes twenty-one off-street parking spaces and approximately 8,600 square feet of landscape/open space. There is no requirement for amenities for projects under twenty units in the HDR zone, but the applicant has provided landscaped space for around forty-one percent (41%) of the project area.

RELEVANT HISTORY

As stated earlier, the applicant has adjusted his proposed project over the previous six months. The initial concept for three levels, fifteen units, and a reduced parking request raised concerns from the neighborhood and from Provo City Staff. Through discussions with the applicant and three rounds of revised plans with the CRC (Coordinator Review Committee) the project has been able to address concerns with building height, setback, and parking. The applicant has been responsive to staff comments and acknowledges future design details that will need to be addressed in the future Project Plan application if the zone change and General Plan amendment are granted by the City Council.

STAFF ANALYSIS

Analyzing the surrounding area shows a variety of land uses within five hundred feet of the subject property. Overall, there are single-family homes to the west, condos (Garden Villa) to the north and east, and apartments (Stadium 150 and Stadium Garden) to the south; equating to around 118 residential units. Further to the south along Canyon Road there are the Timp Towers apartments and Timpangos Gateway Condominiums; another 178 units between them. The scale for the proposed project would fit well in this corridor. The two-story concept is not as tall to the apartments and condos to the south, and would match the level of the condos to the north and east; with

a height restriction of thirty feet (30'), it would be less than what the single-family homes can be built to in the R1 zoning to the west.

In order to analyze the proposed zone change against the General Plan, staff uses the criteria in Section 14.02.020, as follows: (Staff response in **bold type**)

Before recommending an amendment to this Title, the Planning Commission shall determine whether such amendment is in the interest of the public, and is consistent with the goals and policies of the Provo City General Plan. The following guidelines shall be used to determine consistency with the General Plan:

(a) Public purpose for the amendment in question.

Staff response: The applicant has noted that the purpose is "to engage in a redevelopment that significantly improves the aesthetic and use of these otherwise under-utilized properties" and to provide additional housing in the area.

(b) Confirmation that the public purpose is best served by the amendment in question.

Staff response: Staff feels that the applicant has worked to provide a project that would help meet the above goals and that the zone map amendment with the proposed development agreement would best meet those goals.

(c) Compatibility of the proposed amendment with General Plan policies, goals, and objectives.

Staff response: One of the top three land use strategies listed in Chapter Three is to "promote small scale, infill development across the city". Staff feel this plan is consistent with that strategy, but also is consistent with the goals later on in that chapter to "promote neighborhood scale development in residential areas, including a mix of density" (goal 1c).

(d) Consistency of the proposed amendment with the General Plan's "timing and sequencing" provisions on changes of use, insofar as they are articulated.

Staff response: This proposal is consistent with the relevant implementation matrix on page 92 of the General Plan.

(e) Potential of the proposed amendment to hinder or obstruct attainment of the General Plan's articulated policies.

Staff response: The proposed amendment should not hinder or obstruct attainment of the General Plan policies. The zone change away from the General Commercial zone in this case doesn't have much impact on the economic development goals for the City, as this commercial property has been struggling over the past decade.

(f) Adverse impacts on adjacent land owners.

Staff response: Staff feel that the ability to guarantee the building height and offstreet parking as shown in the concept plan alleviates any possible adverse impacts on adjacent land owners with this request. The height is consistent with surrounding allowances and the parking provides more stalls than what is required by code.

(g) Verification of correctness in the original zoning or General Plan for the area in question.

Staff response: Staff has verified the zoning and General Plan for the area in question.

(h) In cases where a conflict arises between the General Plan Map and General Plan Policies, precedence shall be given to the Plan Policies.

Staff response: Staff has shown that this rezone will be consistent with the policies of the General Plan, which is important in this case, as the General Plan map for the property is proposed to change with this request.

In addition to these standards, the General Plan identifies the following criteria for proposed rezone applications for housing developments: **(Staff response in bold)**

- Would the rezone promote one of the top 3 housing strategies?
 - o Promote a mix of home types, sizes, and price points
 - Support zoning to promote ADUs and infill development
 - Recognize the value of single-family neighborhoods

Staff feel that this request meets all three strategies. The proposed rezone would help to promote a mix of home types, sizes, and price points by bringing in a different style of one-bedroom units. It is also recognized that this zone change would bring in an infill development for property that is underutilized. The project also recognizes the value of the nearby single-family neighborhoods by keeping the height of the building consistent with that of those homes.

• Are utilities and streets currently within 300 feet of the property proposed for rezone?

The adjacent streets, 2210 North and Canyon Road, have been verified by engineering to be able to handle the additional vehicle trips. Utilities are available in the area but will most likely be upgraded for water service.

• Would the rezone exclude land that is currently being used for agricultural use?

There are no agricultural uses in the area.

 Does the rezone facilitate housing that has reasonable proximity (1/2 mile) to public transit stops or stations?

Yes, the closest transit stop is at 2230 N Freedom Blvd and is about a $\frac{1}{2}$ mile away, as is the BYU Stadium UVX stop.

 Would the rezone encourage development of environmentally or geologically sensitive, or fire or flood prone lands? If so, has the applicant demonstrated these issues can reasonably be mitigated?

No, the request would not encourage development in any hazardous lands.

 Would the proposed rezone facilitate the increase of on-street parking within 500 feet of the subject property? If so, is the applicant willing to guarantee use of a TDM in relation to the property to reduce the need for on-street parking?

No, the applicant has provided twenty-one (21) off-street parking spaces on the site when the city code only requires eighteen (18) off-street spaces.

• Would the rezone facilitate a housing development where a majority of the housing units are owner-occupied? Is the applicant willing to guarantee such?

These units could be built as condos or apartments. The developer could bring a Project Plan for condo units and a HOA that restricts rental units.

 Would the proposed rezone facilitate a housing development where at least 10% of the housing units are attainable to those making between 50-97% AMI? Is the applicant willing to guarantee such?

No, the current proposal would be market-rate.

CONCLUSIONS

Staff has appreciated working through the different iterations of this project and believes the current version has addressed the initial concerns. Being able to guarantee the site layout with a limit on the height and number of units, while providing the required parking should be a benefit to the tenants and the area. Additionally, keeping a good percentage of the site as landscaped space helps to provide a more livable apartment for future residents. The scale and design blend with the residential character of the neighborhood more appropriately than the previous proposal. Additionally, various uses have been tried in the commercial building and all have struggled to stay in business.
