Question about how we can get more clean energy in Provo. George talked about the city's strategies to increase Provo's reliance on solar and other sources of clean energy.

Question about growth and pressures on transportation and energy—why are we building so many single-family homes? Concern there are too many apartments being built and not enough starter homes. Travis talked about the importance of good planning. George talked about the importance of smart land use policy and transit and active transportation.

Question about plans for homelessness. George talked about plans that are being explored by the council.

Question about how to bikeability. Travis talks about how city is trying to make it more of priority.

Question about 1500 W. Travis talked about decision to not connect the street to 2000 S in Orem.

Beth reported on District 4 projects.
