***Permit for Lookout Tower at 2958 North Iroquois***

We are responding to the Board of Adjustment Hearing on September 18 to register our disapproval to the proposed lookout tower in our residential neighborhood that will be heard by the Board of Adjustment today, September 18. This seems inappropriate for such a neighborhood. It is not secondary to a residential house. And, if it is in any way connected with the helicopter that flies very low over our home and other homes in the neighborhood, we are more opposed to such a structure. We suspect that is the probable accessory use.

A few days ago, as we were working on our backyard patio, an extremely loud helicopter flew barely over the trees in our yard, headed for the Galland's back-yard landing pad. Would a tower encourage more such flights?

Thanks for your consideration.
